

## COMPANY HISTORY

Sea & Shoreline's founder Jim Anderson started his career cultivating lawn grasses of various species to accompany his nursery operations. Jim ventured into seagrasses when a local favorite fishing area was threatened with closure to boats as the result of extensive propeller scarring.

Jim argued that repairing the seagrasses was more logical, and began developing technologies to address seagrass restoration needs. As a turf farmer/grower, he felt that using farming skills and retooling them to fit aquatic restoration needs would be a logical transition.

He founded the company in 2014, and since then, the company has not only successfully restored countless rivers, lakes, lagoons, and estuaries, but also pioneered innovative technologies that help to ensure the long-term success of aquatic restoration projects.

### **About Sea & Shoreline, LLC**

Sea & Shoreline is the foremost expert in transforming corrupted aquatic environments into healthy, thriving, and sustainable ecosystems. Based in Florida, Sea & Shoreline has completed more aquatic restoration projects than any company in the world using scientifically validated processes and patented technologies. Sea & Shoreline operates its own seagrass aquaculture nursery and provides services that include dredging; seagrass/submerged aquatic vegetation restorations; propeller scar restorations; oyster, coral and artificial reefs; living shorelines; vegetated retaining walls; wetland plantings; and seagrass mitigation banking.
