

PROJECT SPOTLIGHT

Blue Springs Bank Stabilization

Project Location: Blue Springs State Park, Orange City, FL

Name of Owner: Florida Fish & Wildlife Conservation Commission

Owner Contact: Taylor Kroll, Engineer III

Construction Date: 4/15/21 – 8/25/21

Scope of work

1. Clearing and grubbing
2. Installation of rip rap
3. Bank stabilization and grading using various geotextiles and various native plants

FWC contracted with Sea & Shoreline to stabilize the bank in Blue Springs Run of the Blue Springs State Park. The work included reconstruction and stabilization of designated shoreline areas of the Blue Springs Run in the Florida Department of Environmental Protection's (FDEP) Blue Springs State Park including integrated soil bioengineering and natural rock wall construction, removal and disposal of existing structures, public access controls, manatee avoidance and protection, and temporary erosion and sediment control measures. The project required a combination of underwater and terrestrial construction.
